

Expert Opinions of SS White Cavity Prep Products

Great White Gold Series

1. Efficiency:

One element to creating an efficient office is identifying and using products that are multi-functional. The Great White carbide bur performs many tasks from preparation to restoration removal and can greatly streamline your selection of rotary instruments.

Dr. Louis Malcmacher

2. General Quote on Great White Gold Series

Although it is designed for cutting metal, the Great White # 2 is very efficient at removing caries.

Dr. Stephen Abrams

3. Crown Removal

It is important that once the decision is made to remove rather than repair a defective crown or bridge, that it be removed from the abutment tooth or teeth in an a traumatic manner. Using a Great White bur, the task is safely and easily accomplished.

Jazz

1. Jazz Supreme:

Composite polishing is an underappreciated art. The polish that I see through the microscope using SS White Jazz Supreme polishers is unparalleled. My patients report that their large composite restorations are significantly smoother than their natural teeth.

Dr. David Clark

Jazz Supreme is a superior polishing system that allows you to create a beautifully reflective gloss in one easy step, thus maximizing chair-time by eliminating the need to use the more cumbersome two to three step polishers that have become standard for polishing in the dental industry today.

Dr. Joe Blaes

2. Jazz P3S:

Jazz P3S pure diamond polishers will create a high luster polish thus eliminating the need for additional glaze firing or paste, saving time for both you and your patients.

Dr. Joe Blaes

After using diamonds to finish and refine indirect porcelain restorations, it was always a challenge to bring back the original luster. Using the Jazz P3S ceramic polishers has solved that problem in an easy to use polishing system that brings back the gloss and polish to rough porcelain.

Dr. Ian Shuman

1. Safe End and Jazz Supreme

When finishing composite resins I use Safe End finishing burs and Jazz polishers because it allows me to complete my esthetic restorations with the results I demand more efficiently and effectively with less steps in less time. These finishing burs and polishers are composite finishing perfected and simplified.

Fissurotomy

1. Sealant:

The use of the SS White Fissurotomy Burs is ideal when performing preventive resin restorations on primary and permanent teeth.

Dr. Fred Margolis

Traditional sealants are temporary in nature, with the advent of magnification and Fissurotomy, a new level of long-term treatment success can be realized.

Dr. David Clark

2. Minimal Intervention cavity preparation:

Fissurotomy is a pain-free way to explore and restore in 3-5 minutes." "In this era of minimally invasive, conservative dentistry, Fissurotomy is the most ideal instrument for removal of incipient decay and creating an ideal preparation for restoration with a composite resin. Fissurotomy allows clinicians to build their practice through patient referrals.

Dr. Howard Glazer

The SS White Fissurotomy Kit is ideal for incipient fissure caries in primary and permanent teeth.

Dr. Fred Margolis

The use of the SS White Fissurotomy burs allows clinicians to perform minimally invasive dentistry when it is most appropriate, early in the diagnosis.
